BANKATHON

`<code> PSD2 is the XS2Adventure </code>`

`<date> 09.10.2016 - 11.10.2016 </date>`

recap

Facts

- Bankathon was the kickoff for the first Fintech Week Hamburg
- 3rd Bankathon was the largest Bankathon ever
- 85 participants, 21 teams, 16 sponsors, 9 media partners, 6 API partners and more than 250 spectators during final pitches
- First time that Bankathon had a focus: PSD2 & XS2A

Focused Bankathon

- Bankathon had the goal to find answers to some big PSD2 & XS2A questions:
What services will arise through the new regulatory?
- Based on figo API and other APIs the participants were asked to build a new service on top of an existing financial account – such as bank account, credit card, investment portfolio or any other financial account
- For that figo provided an updated version of its API: With the “figo tagger” all transactions get automatically categorised
- This allowed many new use cases based on XS2A

Participants

- The participants came from all over Europe: including Berlin, Frankfurt, Vienna and Barcelona
- Team members were from
 - Traditional banks: Aareal Bank, Comdirect, Hanseatic and more
 - Service contractor for banks: GFT, KI Finance and more
 - FinTech startups: Aboalarm, Candis, CollectAI, fino and more
 - And single developers
- The detailed distribution was:
 - Bank: 25,6%
 - Service contractor for banks: 23,1%
 - Startup: 46,2%
 - Single Developer: 5,1%

Quotes I

“Per its original design, the Bankathon has brought together developers, fintechs, innovators and established market players to work jointly on specific solutions. The resulting impact is unique.”

Holger Spielberg (Aareal Bank)

“The Bankathon had a very particular focus on PSD2 and XS2A, which is an important topic for us as a bank. I was fascinated by the amount and high quality of ideas regarding this rather dry subject.” **Michel Billon (Hanseatic Bank)**

“It is a great team-building event with a strong hands-on character. No long speeches, but the teams create something truly new and innovative.” **Matthias Lange (FinLeap)**

“The diversity of participants and the resulting combination of cooperation vs. competition is quite unique and differentiates Bankathon from other Hackathon events I have attended recently.”

Thomas Obermeyer (SAP)

Quotes II

“Inspiration, creativity and energy – it is amazing to see what is possible after 30 hours of hacking!”
Tobias Lücke (Haspa)

“We will surely find one or other Bankathon topics in our own product offering in the future.” –
Christian Müller (TeamBank)

“One of the best banking events, because people don’t just come to talk about digital change and fintech, the teams actually show how it’s being done.” **Konstantin Wehrhahn (FinTech Group)**

“For us, the figo Bankathon is an inspiring technology forum. The teams are working on completely new concepts and services and we are eager to follow up on the best ideas for our business.” – **Michael Koch (Deutsche Bank)**

EVENTS & MESSEN 20. Okt. 2016

Bankathon 2016: PSD2 ist im Banking angekommen!

IntraBase, fintracer, Stockbattle sollte man sich merken

Unbestritten: Der Bankathon ist der zentrale Hackathon der Branche, der Banken und FinTechs seit Jahren zusammenführt. Diesmal im Rahmen der **FinTech Week Hamburg**. Das zentrale Thema – die von Banken bisher gefürchtete EU-Richtlinie PSD2. Doch das muss nicht sein, wie 85 Programmierer in 21 Teams bewiesen. Mit 'Access to Account' zeigten die Teams (auch Bankenteams nahmen teil) welche schicken Lösungen sich mit einem Bankkonto umsetzen lassen. Abgeräumt hat IntraBase.

Das Team IntraBase pitcht seine Idee Quelle: Bankathon/figo

figo's Bankathon proves it: PSD2 is already a reality!

Banken als Plattform

Der Banker von morgen trägt Hoodie und programmiert Chatbots oder Anwendungen für Amazons Sprachcomputer Echo. Beim „Bankathon“, einer Wortkombination aus Bank und Hackathon, treten in Hamburg 22 internationale Hacker-Teams an, um zwei Tage rund um die Uhr die innovativste Idee für das Banking von morgen zu programmieren.
